

Bug Report

Bug ID: BUG_TC_01

Title Login process stuck on "Loading" for several seconds without redirecting to dashboard

Steps to Reproduce:

1. Open the mobile app.
2. Enter valid credentials and tap the Login button.
3. Observe the login process.

Expected Behavior: After tapping the Login button with valid credentials, the app should authenticate the user and redirect to the user dashboard.

Actual Behavior: The Login button shows "Loading" for around 15 seconds, then displays a "Login Successful" message, but the user is not redirected to the dashboard.

Title User is logged out unexpectedly after tapping or changing profile picture

Steps to Reproduce:

1. Log in to the mobile app with valid credentials.
2. Navigate to the Profile screen by tapping the profile picture.
3. Attempt to change the profile picture by tapping on it and selecting a new image.
4. After uploading new image tap on profile picture.

Expected Behavior: The user should remain logged in after tapping or updating the profile picture.

Actual Behavior: The user is unexpectedly logged out after tapping or changing the profile picture.

Title Unnecessary "Create" (Plus) Button Displayed on Profile Screen

Steps to Reproduce:

1. Log in to the mobile app with valid credentials.
2. Tap on the profile picture of an employee from the home screen.
3. It will be redirected to the Profile screen.
- 4 Observe the plus ("+") icon at the bottom-right corner of the screen.

Expected Behavior: The profile screen should not show the plus button. If shown, it should perform a clear and useful action.

Actual Behavior: A plus icon appears on the profile screen, but it is non-functional and does nothing when tapped.

Title User cannot log in after auto logout without clearing app data

Steps to Reproduce:

1. Log in to the mobile app with valid credentials.
2. Wait for the session to expire or tap on logout in profile section.
3. Attempt to log in again using the same valid credentials.

Expected Behavior: The user should be able to log back in normally without needing to clear app data.

Actual Behavior: The login fails after logout. The user must manually clear app data to log in again.

Title	Attendance request list fails to show 'no data found' on empty search result
Steps to Reproduce:	<ol style="list-style-type: none">1. Log in to the mobile app.2. Navigate to the My Attendance screen.3. Use the search bar to enter a value that does not match any record.4. Observe the table, it displays "No data found" in the first row.5. Now navigate to the Attendance Request List screen.6. Use the search bar again to enter a non-matching value.7. Observe the table's response.
Expected Behavior:	Both screens should consistently display a "No data found" message when search results return empty.
Actual Behavior:	My Attendance screen shows a proper "No data found" message.
